

Monthly Executive AI Program Review

Date: February 10, 2026

Pilot Metrics

Current pilot statistics: 126 active users 842 total queries 71% positive feedback 18% partially useful responses 11% failed retrievals **Common Failure Categories** outdated meeting notes duplicate document versions missing source attribution incorrect summarization of technical incidents **Executive Concerns**

The COO requested: measurable productivity impact reduction in internal support tickets clear ROI metrics Finance questioned whether external API costs would scale sustainably.

Can estimated that OpenAI API usage could exceed budget if daily queries surpass 25,000.

Product Direction Discussion

Selin proposed: hybrid architecture local embeddings smaller open-source inference models for low-risk tasks Burak suggested adding: multilingual support voice interface Slack integration Zeynep warned that Slack ingestion would require additional compliance review.
